

Tata Consortium and Airbus Defence begin their journey for Make-In-India aircraft.

India's first private-sector aircraft manufacturing facility is going to be at Vadodara.

Make-In-India is gaining momentum big time in the defence sector. The recently concluded DEFEXPO 2022 edition at The Helipad Exhibition Centre (Gandhinagar) and participation from the private sector companies prove that the Govt is deeply committed to manufacturing defence items in India. India strategically invests in getting upgraded defence technologies, arms, and ammunition. But now the shift is to get the things manufactured/assembled in India to boost the defence manufacturing sector and generate employment. In September 2021, India has formalised an agreement with the Airbus Defence and Tata Consortium formalised to acquire 56 Airbus C295

Shri Rajnath Singh, Defence Minister

aircraft. Out of these forty will be made in India. Vadodara is the chosen city where the manufacturing facility is being built. PM Modi laid the foundation stone of that manufacturing facility on 30 Oct 2022. In his speech at that event, he said, "India has been manufacturing parts for airplanes for a long time, but now it will manufacture an entire airplane. This project will be supported by more than 100 MSMEs. And export orders will also be taken up," Big

opportunities are opening up in the defence manufacturing sector. To facilitate skill development for the aerospace and aviation industry, in April 2022 Airbus signed a Memorandum of Understanding (MoU) with Tata STRIVE, a skill development initiative of Tata Trusts, and the Aerospace and Aviation Sector Skill Council (AASSC) to train young Indians for aviation and aerospace jobs.

The 8th Edition of Rajkot Machine Tools Show - 2022 was scheduled and executed beyond expectations. The exhibition was in action from 21st to 24th September 2022 at NSIC Ground, Aji Industrial Area, Rajkot, Gujarat, India. The RMTS 2022 was a one-stop destination to address the manufacturing and machine tools requirements of various industry sectors in Gujarat. Rajkot Machine Tools Show-2022 covered the entire gamut of machine tools, ancillary industries and other technologies essential for tomorrow's manufacturing. RMTS 2022 proved to be even bigger and better edition as compared to all its previous editions. RMTS 2022 was a Super-hit in terms of its interactive networking experience that it offered to all its visitors and participants alike, with its infrastructure and state-of-the-art amenities of its venue.

Breaking all the traditional expectations by becoming India's leading exhibition for the engineering sector, RMTS 2022 had players from all related fields of engineering and machine tools registering for humongous sales and interactive and fruitful deals. Products, processes, technology, emerging innovations, active participation of automobile companies, knowledge exchange with world-leaders, investment opportunities, business tie-ups and much more were the highlights of this grand event.

TESTIMONIALS

We are participating in Rajkot Machine Tools Show for the very first time. The experience has been good. Rajkot is one of the hubs of machine goods. So, we are very happy to be here. Hopefully, we will continue our participation.

Mirror ERP™

We thank K&D global for organizing the Rajkot Machine Tool Show 2022. It has been

a great experience for us and an excellent platform for interacting with engineering companies in Rajkot. Engineering companies in Rajkot are growing and it has an excellent engineering base which is now becoming global day by day. We wish K&D Global all the best for all their future shows and exhibitions.

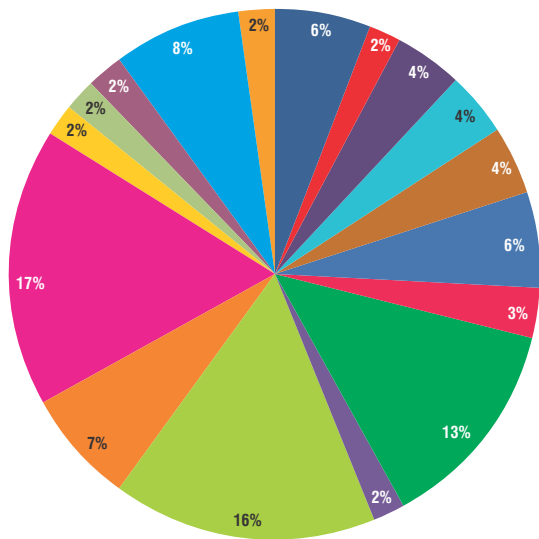

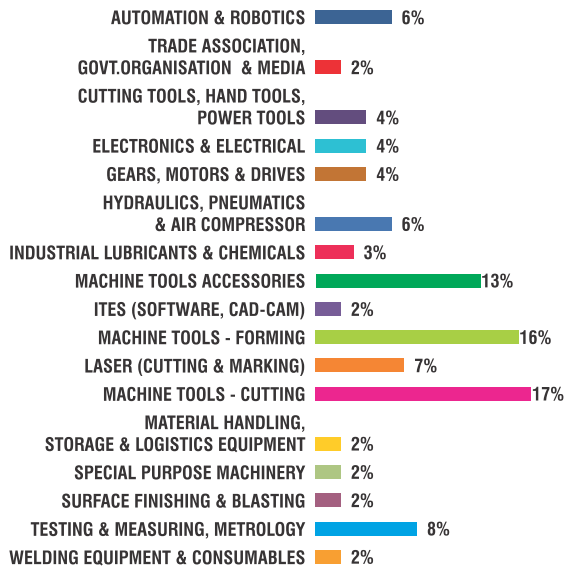

Part of Absolent Air Care Group

This show is very fantastic. A lot of existing customers visited our stall and we have received good inquiries as well. Thanks to RMTS for arranging such a fantastic exhibition.

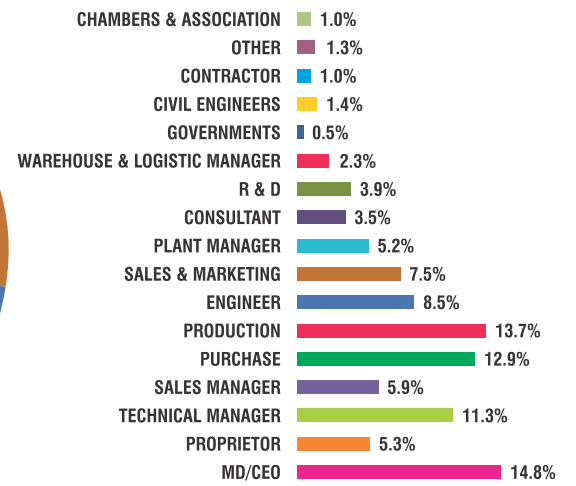

DORMER PRAMET

A lot of people visited our stall and there were a lot of potential customers that seem interested in us. So, we see these as our future customers. I think it's a great experience as far as Rajkot Machine Tools Show is concerned. This is a good experience for this entire Gujarat region and the public visiting here. Overall experience is tremendously good. I would say that it's worth investing. To be very honest, participating in the Rajkot Machine Tools Exhibition is great and the kind of response we are getting it is really very good.

PRODUCT SHOWCASE

The J4 vertical machining center is a highly reliable precision machine. The machine has a rigid structure and wide working area with strokes X axis- 600, Y axis- 600 and Z axis-600. J4 vertical machining center comes with a choice of spindle power ranging from 11 to 22 kW and spindle speeds upto 12,000 rpm. The high speed 24 pocket tool magazine with faster tool change reduces the non cutting time, and the machine takes less than 2 seconds for tool changing. The ergonomically designed machine supports easy loading and unloading operations. The machine can be easily configured to handle different materials like steel, aluminum, brass, die steel, inconel and titanium. The J4 is highly versatile to cater to major industries like Automobiles, Die and Mould, Pumps & Valves, Agriculture equipment, General Engineering, etc..

K and D Communication Limited Honoured to Partner with International Dairy Federation & National Dairy Development Board to host the World Dairy Summit

The four-day-long IDF WDS 2022, held from 12th to 15th September, was a congregation of global and Indian dairy stakeholders including industry leaders, experts, farmers and policy planners centring around the theme of 'Dairy for Nutrition and Livelihood'. The last such Summit was held in India about half a century ago in 1974.

The Indian dairy industry is unique because it is based on a cooperative model that empowers small and marginal dairy farmers, especially women. Driven by the vision of the Prime Minister, the government has taken multiple steps for the betterment of the dairy sector resulting in an increase in milk production by more than 44% in the

last eight years. The success story of the Indian dairy industry, accounting for about 23% of global milk, producing around 210 million tonnes annually, and empowering more than 8 crore dairy farmers, was showcased at the IDF WDS 2022. The summit also helped Indian dairy farmers gain exposure to global best practices.

India's first private-sector aircraft manufacturing facility is going to be at Vadodara.

N Chandrasekaran, Chairman, of Tata Sons said, "With the set-up of the Final Assembly Line (FAL) in Vadodara, the Tata Group will now be able to take aluminum ingots at one end of the value stream and turn it into an Airbus C295 aircraft for the Indian Air Force. This is a historic moment not only for the Tata Group but for the country, as it embraces the Hon'ble Prime Minister's vision of being truly 'Atmanirbhar'". "We are honoured to play a role in this historic moment for aerospace in India. Our Airbus teams are committed to supporting the modernisation of the Indian Air Force with the C295 programme, which will also contribute to the development of the private defence manufacturing sector in the country," said Guillaume Faury, Airbus Chief Executive Officer. "The C295 programme, in

...continued from page 01

partnership with the trusted Tata Group, is strongly aligned with the Government of India's vision of an 'Atmanirbhar Bharat' (self-reliant India)."

The future lies in adaptability. How well you design solutions and services that cater to the evergrowing needs of the defence manufacturing sector. Your willingness to invest in R&D, newer technologies and machinery, and skill development will decide your success. And most importantly, how well you exhibit your solutions and services to the key decision-makers will translate into your growth. There is no history of any state (developed and developing economies) that has reduced its spending sizeably on defence in the last 3-4 decades.

K and D's Helipad Exhibition Centre becomes the proud host to DefExpo 2022

In order to give a boost to the defence sector in the country, the Ministry of Defence (MOD) hosted the 12th edition of India's biggest ever defence exhibition between 18th to 22nd October 2022 at the Helipad Exhibition Centre, Gandhinagar, Gujarat.

With the theme 'Path to Pride', it highlighted India's commitment to self reliance in defence production. It was the first of its kind to exclusively showcase Indian participants including Indian companies, Indian subsidiaries of foreign OEMs, divisions of a corporation registered in India and other exhibitors that have a joint venture with an Indian company.

The exhibition also allowed people to take a peek into India's vision for 2047 at a special pavilion by the Department of Defence Production, MOD. Another pavilion was dedicated to highlight the skill of Indian Start-ups engaged in research, development and innovations in cutting edge technologies.

PM Narendra Modi, who also inaugurated the event, unveiled HTT-40, a trainer aircraft designed and developed by Hindustan Aeronautics Limited (HAL)

The defense industry of India showcased its latest innovations and technologies of military equipment in the fields of Land, Air, and Sea.

ITMACH India 2023 To Host Textile Machinery Makers “Right In The Market”

ITMACH India - International Textile Machinery & Accessories Exhibition shall host Textile Machinery and Technology suppliers in Helipad Exhibition Centre in Gandhinagar, Gujarat from 1-4 th March 2023. Gujarat is the leading destination for investment in textile and apparel sector in the country and gearing up with Prime Minister Modi's "Make in India" campaign for next level of growth. The 4 th edition in the series, ITMACH India to showcase the latest machinery and technology in textile manufacturing. With the participation of leading exhibitors in last 3 highly successful shows, ITMACH has

been a major stimulant to the growth of India's Textile industry. India today is the 2nd largest manufacturer and exporter in the world.

ITMACH India's venue -the Helipad Exhibition Centre, Gandhinagar is among India's largest and most modern such facilities in the country and boast of hosting leading events like Defense Expo, Vibrant Gujarat Trade Show, Plast-India etc. Gujarat is a major textile hub of India. On the other hand, Gujarat accounts for 30% of India's exports in cotton, cotton fabrics and made-ups, 37% of India's cotton produce and 60% of India's cotton export in terms of value.

Gujarat also produces approximately 50% of India's man-made fibre. It is the largest producer of synthetic fabric in India and accounts for 30% of India's woven fabric, 90% of weaving machinery manufacturers are established in Gujarat and it produces 25% of India's technical textile output.

ITMACH India 2023 will be the meeting point for domestic and international exhibitors and visitors who would interact after the painful pandemic era. Organisers invite you discover new markets, buyers / sellers and to be part of the event and meet the leading manufacturers, technology experts and thought leaders of the industry.
